Dear Cris, dear all,

The recent consensus of Spanish experts with recommendations for the prevention of fragility fractures is a truly insightful statement that shows the important steps we all need to take, to improve and strengthen the health services we provide to our elderly population.

We, as the Hellenic Network for Fragility Fractures, find these statements in perfect alignment with our vision and are pleased to endorse them. Furthermore, as we find these statements really important, we should do everything we can to adopt them in Greece.

We look forward to working with you.

Yours sincerely,

**General Secretary**  
**Konstantinos Kothonas**

**Vice President**  
**Panagiotopoulos Elias**
